*FLEET CLEANING DIVISION*

*RUSHING PERFORMANCE.....CLEAN EVERYTIME!!*

## **RUSHING FLEET CLEANING DIVISION PERFORMANCE CAPABILITIES OVERVIEW**

- Rushing Enterprises designs, fabricates, installs, and maintains state-of-the-art Drive Through truck-wash cleaning systems.
- Rushing Enterprises creates, formulates, and blends best in class truck-wash cleaning products.
- Rushing Enterprises employs highly talented, trained, and responsive Technical Support Representatives assigned to maintain our customers truck- wash cleaning systems.
- Rushing Enterprises invests in significant research and development efforts to foster an environment of continuous improvement in its cleaning systems and cleaning products.

## **RUSHING FLEET CLEANING DIVISION UNDERBODY CORROSION MITIGATION OVERVIEW**

- High-pressure chemical application and cleaning mechanism in the SN-250 product penetrates the smallest crevices.
- SN-250 Underbody Corrosion Mitigation product removes and neutralizes all chloride and magnesium based molecules it encounters.
- SN-250 Underbody Corrosion Mitigation product changes crystal habit introduced by the SN-250 product and imparts an insoluble crystalline coating structure to temporarily protect all steel surfaces and provide microscopic coating protection on wiring harnesses and electrical contacts.
- SN-250 is safe on all vehicle surfaces, including glass, as applied and is environmentally friendly, easily neutralized within the typical wash bay cleaning product applications.

## **SN250**

### **Modifies Crystal Habit Of Salt**

**Removes salt quicker and more completely than water alone.**

- ☐ Drying salt solution covers entire bottom with stacked crystals and creeps up the sides.
- ☐ SN250 treated shows flattened crystals, crystal growth gaps and less tendency to creep up sides.
- ☐ Modified crystals structure on upon drying means more effective salt removal and cleaner surfaces.
- ☐ SN250 has been demonstrated in working conditions to effectively remove road grime, salt and other anti-skid materials.

## **BUILT WITH PRODUCT ENHANCEMENT FEATURES**

**Contains an acid corrosion inhibitor.**

Built in acid corrosion inhibitors are all about the metal this product treats. Wiring harnesses, soft metals and steel are all safe with SN250.

**Rushing Enterprises**  
16024 US 431, Headland, AL 36345  
334-693-3318

## **BUILT WITH PRODUCT ENHANCEMENT FEATURES**

**Contains a salt crystal modifier which stops crystal formation and continues to work after the product is long applied.**

**Salt Crystals**

**Neutra Salt Effect**

**The salt crystal modifier built into SN250 is the driving force to stop crystal forming and it continues to work.**

**Rushing Enterprises**

334-693-3318

## **EFFECTIVE AND SAFE**

- ❑ **Safe, biodegradable and effective, SN250 enhances the undercarriage flush, making the process more complete.**
- ❑ **An organic acid base accepts all of the products features and delivers a very safe product to use, handle, and is gentle on all surfaces including glass.**

**Rushing Enterprises**

**334-693-3318**

## **BUILT WITH PRODUCT ENHANCEMENT FEATURES**

**Penetrant package drives deep to where crystals and rust form.**

**The penetrant package allows SN250 to work deep into cracks and crevices to defeat salt rime and to stop rust from forming and progressing.**

**Rushing Enterprises**  
**16024 US 431, Headland, AL 36345**  
**334-693-3318**

## **BUILT WITH PRODUCT ENHANCEMENT FEATURES**

**Excellent anti scale inhibition properties.**

Anti scale inhibition package retards salt crystal formation and treats the water that is used to hydrate the product from drum kits. It is added to combat the silicates, chlorides, and sulfates that are in water systems.
